### **Our Tenant Interior Division**

We specialize in new tenant fit-outs, as well as renovations to existing spaces. Working with the area's leading general contractors and developers, our staff is committed to servicing all your interior construction needs from pre-construction to final punch out. Our electricians are experts in working in occupied spaces and following strict guidelines -- so that your operations are not impacted by the construction process.

### **Our Service Division**

We provide superior electrical service and maintenance capabilities to many of the area's leading companies, including property management firms, defense contractors, financial institutions, as well as many Fortune 500 companies. Our talented service electricians are experienced and professional -- providing us with a vast pool of resources to give you timely and exceptional service. Our preventive maintenance services, for example, include infrared testing, switchgear tighten ups, and power quality analysis. Our crews are available 24/7 to meet all of your emergency service needs.

### **Our Critical Power Division**

We are experienced in all aspects of critical power management, designed to guarantee that your service never goes offline. We have built and maintained data centers for many of the area's leading companies. We can assist you with all your critical power needs that include sales, installation and service of generators, UPS equipment, PDU and TVSS equipment. Through our Continuing Education Program, we keep our staff on the leading edge of the ever evolving technologies required to maintain your operation running at maximum efficiency.

### **Commitment to Our Customers**

What ties all Contemporary Electrical Services, Inc. operations together and distinguishes us from our competition is the reliability and consistency we give to our many satisfied clients. We provide superior electrical workmanship, efficient project management, on-time delivery, and project completion within budget.

Our clients know they can trust us. They know we will do whatever is necessary to provide them the quality service they require. When we enter into a contract, we join our client in a partnership that aims to get the job done right and within budget.
